

Printober is upon us!

Happy Printober from the Bilbys! To help us celebrate the printing season we are announcing new pricing on our economy range of 3D Printer Filament at \$34.95 per kilogram for the entire month of October.

Our bulk filament offer of 10% off for 10 rolls of filament still applies during this sale! (So you could get filament from as low as \$31/kg during October. You can choose a range of different colours and types of filament, so long as there are at least 10 Bilby brand spools in the single order.

**Makerbot Replicator 2 :
Advanced User Training**

GET MORE OUT OF YOUR REPLICATOR 2/2X

LEARN HOW TO TUNE AND SERVICE YOUR MACHINE FOR OPTIMAL PERFORMANCE. THE LATEST MODS AND UPGRADES, AND HOW TO PRODUCE 50 MICRON PRINTS!

ATTEND OUR ADVANCED TRAINING

This course is designed to provide you with technical training and skills required to tune and service a Makerbot Replicator 2/2X,.

Learn how to:

- Get your print resolution down to only 50 microns
- Modify supports so they are easier to remove
- Fine tune Makerbot for optimal performance
- Machine alignment
- Belt tightening
- Replacing ceramic tape
- Cleaning and replacing nozzles
- Testing/replacement thermocouplers
- Checking and lubricating of rods and moving parts
- How to perform a general service and check
- Plus much more!

A tune and service take home pack (Valued at \$50) is included for every participant in this course.

Normally \$200, **this course is now \$150 for the month of Printober.**

Some places still available on 14 and 15 October - [click here](#) for details.

*Additional participants from same organisation \$65/person.

Places are limited so call us now on 1800 847 333 to secure your place.

For more information on this course as well as our free courses [click here](#).

Buy filament in October for your chance to win

For the entire month of October any order of filament will have a 1 in 5 chance of winning a free 1kg spool of Bilby brand ABS/PLA 1.75/3mm filament.

Printrbot in Australia

As new distributors of the Printrbot range of printers, we want to show you what they can do - we were amazed at the quality of output from the Simple Metal, very close to that of printers three times the price!

We now have LCD Controller Kits in stock. These are very simple to put together, and means that your printer has a screen you can navigate to check the status of your printer, load filament and jog it's axis, and order prints from the MicroSD card - all without connecting to a computer!

Call us during Printober to have a free 75 micron owl mailed to you.

Halloween ready!

A green/white in light and glows with a bright green light in the dark. Charges under UV light (in the sun or under a UV torch) New and improved formula.

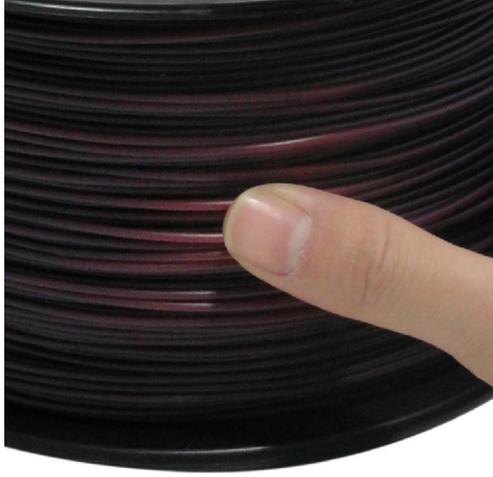

Introducing our new Colour Changing PLA Filaments.

Indoors it is a creamy white but will become a vibrant blue in high UV (very sunny days/ flash-light) and a soft lavender purple in low sun.

This product is blue at room temperature but will turn white to the touch, or when the temperature is above 36C/97F

This product is pink at room temperature but will quickly turn purple when touched, or when the temperature exceeds 36C/97F

Indoors it is a creamy white but will become a vibrant royal purple in high UV (very sunny days/ flash-light) and a soft lavender purple in low sun.

Checkout the New Gloss Yellow PLA.

It is a bright, solid yellow, but is not fluro.

It is in stock and ready to print your own Mario Kart Medal.
